Hi All.

So my friend at the Passaic River Rowing Club passed along the membership request and the below is an email from someone within his group who's interested in being a CAG member. Before I respond and give him the address and specifics, I just wanted to confirm that you're all OK with this. I don't know him personally, but given all your community ties I thought maybe you would. if you're OK with this let me know and I'll go ahead and fill him in or if you'd like to extend the invite with the details on when/where yourselves that's fine by me, I'll just alert him that he should expect to hear from one of you.

Please let me know.

Thanks,  
Elizabeth

Elizabeth,

I've mentioned to various folks over the past couple years that I'd like to get involved with this group, but somehow never made the list. Can you send me specifics and the address? Thanks.

Ben

Jeff

Please see the email below. A colleague of mine who is involved in the Passaic River Dredging Project, is looking for new members for the Community Advisory Group.

Is there anyone in the club who has the time to commit to meeting periodically and representing the club?

Please forward this to Ben Delisle for me.

Thanks  
Mike Naughton

Hi Mike.

Since you mentioned this as being where you saw your last message from me, figured I'd go right with this route. Hope that's OK. Anyway, if you or another member is interested/willing to become a member of the community advisory group (CAG for short), our next meeting is Thursday, November 10th at 6:00 at St James Church in the Ironbound. Here's a link to some basic info about that CAG:

<http://www.ourpassaic.org/CAG.aspx>

It needs updating as the roster has changed with time as have the co-chairs and the sub-committees, but the values statement will give you a sense of what they're all about. If you could let me know what you decide I'll pass that info along to the facilitator and co-chairs so they can get a name card made up and they'll know to be expecting someone, if necessary. I can also then send you specific details with the address and entrance door.

Regarding the Third River smell, I passed along your question to both our EPA project manager for the 17-mile study that's ongoing and the the DEP project manager for that study. Not sure what they'll be able to do but might help pinpoint an area to study if they haven't already. The CSO study still needs to be done if it's related to that and there might be additional tributary investigations needed as well but I have to admit I've been a bit out of the loop on that study since I've been swamped with the construction for the dredging project downstream.

Take care,  
Liz
